

StateWORKS Price list 2008**Software development tools**

Product	Number of user licenses	Unit Price [EUR]	Notes
StateWORKS Studio PRO Professional Edition	1	4,950	Multiple user license packs available at discounted volume pricing
StateWORKS Studio BAS Basic Edition	1	1,450	Design and run-time limited to 300 objects
VFSM run time library for PRO and BAS editions	unlimited	free	For MS Visual Studio ²⁾
RTDB run time library for PRO and BAS editions	unlimited	free	For MS Visual Studio ²⁾
RTDB based Standard Executor for PRO and BAS editions	unlimited	free	For MS Visual Studio ²⁾
StateWORKS Studio BASE Basic Edition for educational purpose	1	please contact us	Design and run-time limited to 300 objects Limited support
	Lab	please contact us	
VFSM run time library	unlimited	free	For MS Visual Studio ²⁾
RTDB based Standard Executor for BAS edition	unlimited	free	For MS Visual Studio ²⁾
StateWORKS Studio LE	-	free ¹⁾	Design and run-time limited to 1 state machine, 100 objects
VFSM run time library	unlimited	free	For MS Visual Studio ²⁾
support			
StateWORKS Studio Support and Maintenance (after 1 year)	-	15% of the purchase price (per year)	

1). It can be acquired only with the book "Modelling Software with Finite State Machines".

2). See "Run-time systems" on the page 2.

Runtime libraries are free. There are no royalties or fees on executables generated by StateWORKS Studio.

The listed prices don't include VAT, which needs to be added in certain circumstances for delivery within the European Community.

We deliver software packages either as a download or on a CD. A software package contains all accompanying documents: manuals, technical notes, tutorials as pdf files. Paper documents are generated only on an explicit client's order.

StateWORKS Price list 2008

Run-time systems

Run-time systems are built using RTDB or VFSM libraries. The RTDB library contains a ready VFSM Executor able to process a system of state machines. The RTDB is an integral part of a real time data base which handles conversions between real time input / output signals and the virtual environment where the state machines operate.

The VFSM library offers the VFSM Executor plus a set of access methods required for communication with the Executor.

We can supply VFSM or RTDB library for creation of applications in various environments: writing of your own code for the state machines is eliminated by making use of these Posix-compatible real time libraries. Suitable for Windows™, Linux, VxWorks™ and various other RTOS. Contact us for details.

Training courses

Topic	Duration (days)	Price [EUR] (single person)	Price [EUR] / Person (for 2-4 persons group)
VFSM Technology and StateWORKS	1	900	450
StateWORKS Studio	3	2,200	1,100
StateWORKS Run-time system	3	2,400	1,200

The listed prices don't include VAT, which needs to be added in certain circumstances for delivery within the European Community.

Other expenses associated with each course (travel, hotel and living charges) will be negotiated for each order.

Training courses are offered in English and German.
